

TERMS & CONDITIONS

Last Updated: March 9, 2026

Contact: legal@voice.fun

Purpose and structure

These Terms and Conditions (“Terms”) govern your access to and use of:

- (a) the website located at <https://voice.fun> and any associated domains;
- (b) any SocialFi, devnet, mainnet, campaign interfaces, quests, referral systems, leaderboard functionality, voting or polling interfaces at the Voice.fun platform;
- (c) any embedded or connected blockchain wallet infrastructure;
- (d) any tokens, points, rewards, or digital assets, integrated into the platform; and
- (e) all related software, smart contracts, APIs, and services (collectively, the “Services”).

By accessing or using the Services, you agree to be legally bound by these Terms.

If you do not agree, you must not use the Services.

Definitions

“**User**” or “**you**” means any individual or entity accessing or using the Services.

“**We, us, our, Company**” means the team and an external specialists which are associated to Voice.fun (Aetheryn LTD) brand.

“**Wallet**” means a blockchain wallet (software, hardware, or embedded wallet) used to hold private keys and sign transactions.

“**Digital Assets**” means tokens, coins, digital collectibles, or other blockchain-based assets, whether native or issued by third parties.

“**Points**” means non-monetary, promotional scoring units used inside the Services.

“**Token**” means any Digital Asset that we may issue, support, distribute, or reference, whether now or in the future (including governance or utility tokens), as described in these Terms or the relevant schedule.

“**Third-Party Services**” includes wallet providers, authentication providers, RPC providers, analytics, KYC vendors, and any external websites or protocols.

Regulatory status of the Services

The Services are provided solely as a technology platform facilitating user engagement, digital interaction, voting participation, and promotional campaigns involving Digital Assets.

The Company does not operate as:

- a broker-dealer,
- exchange,
- custodian,
- investment advisor,
- portfolio manager,
- money transmitter,
- financial institution, or
- regulated virtual asset service provider,

unless expressly stated in a separate written agreement or regulatory disclosure.

Nothing in the Services constitutes regulated financial services.

Eligibility and prohibited users

You represent and warrant that:

- You are at least the age of majority where you reside and have legal capacity to form a contract, but no less than 18 years old.
- You are not a resident of, located in, or acting on behalf of a jurisdiction where access or use is prohibited by applicable law or where we have chosen to restrict access for compliance reasons.
- You are not subject to sanctions or on a restricted list maintained by authorities relevant to our compliance program, and you will not use the Services to transact with sanctioned persons or jurisdictions.

We may implement geo-blocking, wallet screening, IP screening, and other controls as part of a risk-based sanctions program. Sanctions guidance for the virtual currency industry emphasizes risk-based programs and screening controls and frames compliance obligations as applying equally to virtual currency and fiat contexts.

Acceptance, updates, and continued use

We may update these Terms at any time. If the changes are material, we will use commercially reasonable efforts to provide notice (e.g., via the interface or email if we have it). Continued use after the effective date of an updated version constitutes acceptance.

Account registration, authentication, and security

Supported login methods

We may support one or more authentication methods, including:

- Email-based login and Web2 identity providers;
- Wallet-based login (signing a challenge with your Wallet); and/or
- Embedded wallet creation and management through third-party providers such as Privy and Reown (or equivalents).

Third-party providers may impose separate terms and privacy notices; you are responsible for reviewing them.

You are responsible for your credentials

You are solely responsible for:

- Maintaining the confidentiality of your devices, email account, Wallet private keys/seed phrases, and any MFA factors;
- All actions taken under your account or Wallet connection; and
- Promptly notifying us of suspected unauthorized access.

We may (but do not have an obligation to) provide account recovery tooling. Due to the nature of blockchains, we cannot reverse on-chain transactions once finalized. Where confirmation levels exist (e.g., Solana's processed/confirmed/finalized), "finalized" is described as rooted/irreversible for high-value/compliance contexts.

Non-custodial posture and wallet responsibility

No custody

Unless expressly stated in a written agreement signed by us, the Services are provided on a **non-custodial** basis:

- We do not take possession of, nor control over, your Digital Assets.
- We do not hold or control your private keys, seed phrases, or signing authority.

If you use an embedded wallet provider or key-management solution, you acknowledge that the technology may involve third-party cryptographic key shares, recovery features, or specialized security models; you are responsible for understanding your wallet's custody model and risk profile.

No fiduciary relationship

Nothing in these Terms creates any fiduciary, advisory, agency, or trust relationship between you and the Company.

The Company does not provide investment, financial, legal, or tax advice and does not act in your best interest.

No transaction reversals

Blockchain transactions are typically irreversible once finalized; you bear all risks of mistaken addresses, wrong network, or unauthorized signing.

SocialFi campaigns: quests, points, tiers, referrals, leaderboards

Points and rewards are promotional; no guaranteed value

Points, tiers, “WL” or whitelist status indicators, and similar reward mechanics are **promotional and discretionary** unless we explicitly state otherwise in a written program schedule.

- Points do not represent money, stored value, or a bank account. Whitelist status, access tiers, and eligibility classifications are promotional designations only. They do not create legal rights, ownership rights, or entitlement to Digital Assets or financial benefits.
- Points are not redeemable for cash and have no guaranteed market value.
- We may modify, suspend, or terminate Point programs at any time, including eligibility, earning rates, and redemption rules.

Anti-Fraud, abuse, and referral integrity

Referral tracking, Points allocation, leaderboard positioning, tier status, and reward eligibility are subject to validation and integrity controls implemented by the Company.

The Company may investigate and take corrective action, acting reasonably and in good faith, where it determines or reasonably suspects that a User has engaged in:

- automated activity, botting, scripting, or artificial traffic generation;
- Sybil attacks, multi-accounting, or coordinated account control;
- referral farming, self-referrals, circular referrals, or artificial amplification;
- manipulation of engagement metrics or voting mechanisms;
- exploitation of bugs, technical loopholes, or unintended functionality;
- collusion or coordinated manipulation of campaign mechanics;
- any conduct inconsistent with the intended spirit of a campaign.

In such cases, the Company may, without prior notice:

- suspend or restrict the affected account(s);
- freeze or revoke Points, referral credits, rewards, or tier status;
- adjust leaderboard rankings;
- disqualify Users from current or future campaigns;
- invalidate associated accounts determined to be under common control;
- delay, reduce, or cancel reward distribution.

Corrective actions may be applied retroactively if abuse is discovered after rewards have been allocated.

The Company’s determination of abuse shall be made in good faith based on available technical and behavioral indicators. The Company is not obligated to disclose specific detection methodologies where doing so would compromise anti-fraud systems.

Participation in referral or campaign programs does not create any vested right to Points, ranking position, or rewards prior to final validation by the Company.

Nature of tier classifications

Tier status, leaderboard positions, and similar classifications are promotional and informational features of the platform.

They are used solely for campaign structuring and user engagement purposes and do not represent property, financial instruments, or legally enforceable rights.

Tier classifications may be modified, reset, or discontinued at any time in accordance with campaign rules.

Participation in any campaign does not create any entitlement to future Digital Assets, allocations, or economic benefits unless expressly stated in a separate written program document.

Leaderboards

Leaderboards may display usernames/nicknames and scores. Ranking logic may be adjusted per campaign.

We do not guarantee leaderboard availability, accuracy, or continuity.

Program modification rights

The Company may modify, suspend, restrict, or terminate any quests, campaigns, referral programs, leaderboard functionality, or reward mechanics at any time, with or without notice.

Participation does not create any entitlement to continued availability.

Quest completion verification may rely on automated systems, APIs, or third-party integrations. The Company does not guarantee accuracy or availability of verification systems.

Voting and polls

Voting features

If the platform includes voting/polls, you understand that:

- Poll creation and participation may require holding or acquiring specific Digital Assets, paying network fees, or using external venues (DEX/CEX).
- Poll and reward mechanics may be defined per campaign. Outcomes may affect reward-pool allocation. Polls and voting mechanisms are campaign features designed for engagement and program structuring. Reward allocation, if any, shall be determined in accordance with the applicable campaign rules, program logic, and eligibility criteria in effect at the relevant time. Participation in a poll or vote does not, by itself, create a standalone contractual entitlement to rewards, tokens, or other economic benefits, except as expressly provided in the applicable campaign documentation.

No guarantee of outcomes or rewards

We do not guarantee the integrity, representativeness, or fitness of any voting mechanism for governance, investment decisions, or legal compliance. You are responsible for independent verification.

Reward allocation discretion

Any allocation of Points, Tokens, or Digital Assets in connection with voting, poll creation, or participation is determined solely by platform-defined logic and discretionary program rules.

The Company does not guarantee any reward allocation.

Rewards may be modified, delayed, reduced, or canceled at any time.

Reward pools may be allocated based on algorithmic, programmatic, or discretionary criteria, including but not limited to:

- voting participation;
- voting outcomes;
- campaign participation;
- engagement metrics.

The Company does not guarantee fairness, proportionality, or expected outcomes of reward allocation.

Token mechanics

This section is drafted to cover both “planned” and “live” token implementations.

Optional token issuance and utility

We may introduce tokens that enable platform functionality (e.g., governance, access, voting, or utility). Unless expressly stated:

- Tokens do not represent:
 - equity or ownership in the Company;
 - shareholder rights;
 - voting rights in the Company;
 - entitlement to dividends;
 - entitlement to revenue;
 - entitlement to assets;
 - debt instruments;
 - deposit accounts;
 - stored value;
 - or any legally enforceable financial rights.
- Tokens are intended solely for functional and utility purposes within the Services.
- Tokens may be subject to transfer restrictions, vesting, lock-ups, or jurisdictional limitations.
- We may suspend token features to comply with law, mitigate risk, or respond to security incidents.

Tokens are intended solely for functional and utility purposes within the Services. They are not designed or offered as investment products, and no Token is marketed or intended to create an expectation of profit derived from the managerial or entrepreneurial efforts of the Company.

The Company does not control, operate, or guarantee any secondary market for Tokens. Any trading, transfer, listing, or market activity involving Tokens may occur independently on third-party platforms not operated or controlled by the Company.

The Company does not guarantee liquidity, price stability, market value, or the continued availability of any Token. The regulatory classification of digital assets may vary by jurisdiction and may change over time.

The Company does not offer any security or investment product. Digital Assets are intended solely for utility purposes within the ecosystem. Users acknowledge that purchasing or holding Tokens carries significant risk and does not constitute an investment in the Company.

No investment solicitation

Nothing in the Services constitutes an offer to sell, a solicitation of an offer to buy, or a recommendation regarding any security, token, or investment product, except where explicitly stated in a compliant offering document approved for a specific jurisdiction.

User responsibility for token acquisition

Participation in certain features of the Services may require the acquisition or holding of Digital Assets.

Any acquisition of Digital Assets may occur through third-party platforms, decentralized exchanges, centralized exchanges, or blockchain protocols not operated or controlled by the Company.

The Company does not:

- sell Digital Assets directly unless explicitly stated;
- guarantee availability of Digital Assets;
- guarantee value, liquidity, or utility of Digital Assets.

You assume all risks associated with acquisition, holding, and use of Digital Assets.

Fees, network costs, and taxes

You are responsible for:

- Network fees (“gas,” transaction fees, priority fees) required to execute blockchain transactions;
- Fees charged by wallets, third-party platforms, or payment rails; and
- All taxes and reporting obligations arising from your use of the Services, Points, or Digital Assets.

Compliance: AML/KYC, sanctions, and law enforcement cooperation

Right to impose AML/KYC measures

We reserve the right to implement AML/KYC procedures, including:

- Identity verification;
- Source-of-funds/source-of-wealth questionnaires;
- Transaction monitoring;
- Enhanced due diligence for higher-risk activity; and
- Refusal, suspension, or termination of service if requirements are not met.

Where your activity is functionally within the scope of “virtual asset service provider” services, FATF guidance defines covered VASP activity broadly (exchange, transfer, safekeeping/administration, and related financial services for issuers), and frames travel-rule expectations under Recommendation 16.

You are solely responsible for ensuring that your access to and use of the Services complies with all laws and regulations applicable to you in your jurisdiction.

The Company does not provide regulatory analysis or compliance determinations for Users.

Access to the Services is prohibited for persons located in, resident in, or acting on behalf of jurisdictions subject to comprehensive sanctions or regulatory prohibitions.

The Company reserves the right to restrict or block access to Users from restricted jurisdictions at its sole discretion.

Sanctions compliance

We may screen users, wallets, and transactions against sanctions lists and apply geolocation/IP blocking and other controls. OFAC guidance for the virtual currency industry describes sanctions-related risks and encourages risk-based compliance programs and screening measures.

Disclosures to authorities

We may disclose information to competent authorities as required by law or to respond to lawful requests, including subpoenas, court orders, or regulatory inquiries.

Intellectual property

Our IP

We own (or license) all rights in the Services, including software, trademarks, UI/UX, documentation, and content, except User Content and third-party materials. No rights are granted except as expressly stated.

User Content license

If you submit content (text, images, usernames, campaign contributions, feedback), you grant us a worldwide, non-exclusive, royalty-free license to host, use, reproduce, modify, publish, and display such content solely to operate, improve, and market the Services, subject to applicable law and our Privacy Policy.

Usernames and associated rankings may be publicly displayed within the Services.

Prohibited content and conduct

You may not:

- Infringe IP rights;
- Distribute malware;
- Attempt unauthorized access;
- Manipulate quests/leaderboards; or

- Use the Services for unlawful conduct, including money laundering, terrorism financing, or sanctions evasion.

The Company reserves the right to remove, restrict, or moderate User Content that violates these Terms or applicable law, or that the Company determines to be harmful, misleading, abusive, or otherwise inappropriate.

Third-party services and protocols

The Services may rely on Third-Party Services, including wallet providers, authentication providers, RPC providers, block explorers, analytics tools, and KYC vendors. We do not control Third-Party Services and are not responsible for their acts or omissions.

We may change providers without notice.

Embedded wallet providers

If you use embedded wallet providers, wallet infrastructure and key management may be operated by third parties.

The Company is not responsible for:

- key storage,
- key compromise,
- recovery mechanisms,
- or wallet provider failures.

Embedded wallets may be generated and associated with user accounts through third-party providers.

The Company does not have access to private keys and cannot recover lost access.

Security; no guarantees

We implement organizational and technical measures proportionate to risk; however, no system is perfectly secure. GDPR recognizes a risk-based approach to security, including measures such as pseudonymisation and encryption where appropriate.

You are responsible for securing your Wallet and devices.

The Company will never request your private keys, seed phrases, or full wallet credentials. Any request for such information should be treated as fraudulent. The Company is not responsible for losses resulting from phishing attacks, impersonation, or unauthorized access caused by User negligence.

Blockchain network risks

The Services rely on third-party blockchain networks, including Solana.

These networks may experience outages, forks, validator failures, congestion, or consensus failures.

The Company is not responsible for blockchain network failures or transaction execution failures.

Suspension and termination

We may suspend or terminate access immediately if:

- Required by law or compliance risk;
- We suspect fraud, manipulation, or prohibited conduct;
- You breach these Terms; or
- We discontinue any part of the Services.

On termination, licenses granted to you end, but provisions that by their nature should survive (IP, disclaimers, liability limits, dispute resolution) will survive.

Digital asset and technology risks

The Services involve experimental blockchain technology, smart contracts, and cryptographic systems that may contain vulnerabilities or errors.

Digital Assets may lose value entirely. Digital Assets are highly volatile and subject to significant market risk. You may lose some or all of the value of Digital Assets due to market fluctuations, regulatory developments, liquidity constraints, or other factors beyond the Company's control.

The Company does not guarantee value, liquidity, or continued availability of any Digital Asset.

Smart contracts used in connection with the Services may contain vulnerabilities, bugs, or unintended functionality.

The Company is not liable for smart contract failures. Smart contracts deployed or integrated in connection with the Services may contain bugs, vulnerabilities, coding errors, design flaws, or unintended functionality.

The Company does not guarantee the security, functionality, or performance of any smart contract, including contracts developed internally or by third parties.

You acknowledge and accept that interaction with smart contracts is at your sole risk. The Company shall not be liable for loss of Digital Assets, failed transactions, unintended transfers, or permanent loss of value resulting from smart contract errors, exploits, or technical failures.

The Company reserves the right to modify platform logic, interfaces, reward mechanics, or associated software components. Where smart contracts are upgradeable, the Company may implement updates to address security, compliance, or functionality requirements.

The Services may be in development, beta, or experimental stages. Development, test, beta, or staging environments may be made available for experimental purposes. Functionality in such environments may be unstable, incomplete, or subject to reset. Assets, Points, or balances displayed in development environments may have no value and may be deleted at any time.

Features may change or be discontinued.

Disclaimers

TO THE MAXIMUM EXTENT PERMITTED BY LAW, THE SERVICES ARE PROVIDED "AS IS" AND "AS AVAILABLE" WITHOUT WARRANTIES OF ANY KIND, WHETHER EXPRESS, IMPLIED, OR STATUTORY, INCLUDING NON-INFRINGEMENT, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND AVAILABILITY.

The Company does not guarantee that the Services will remain available indefinitely.

The Company may modify, suspend, or terminate the Services at any time.

We do not warrant that the Services will be uninterrupted, secure, error-free, or compatible with all wallets or networks.

Limitation of liability

TO THE MAXIMUM EXTENT PERMITTED BY LAW:

- We will not be liable for indirect, incidental, special, consequential, exemplary, or punitive damages, or for loss of profits, revenue, goodwill, data, or digital assets.
- Our aggregate liability for all claims in a 12-month period will not exceed the greater of: (a) USD 100.00 or (b) the total fees paid by you to us for the Services in that period (if any).

Nothing in these Terms excludes liability that cannot be excluded under applicable law.

Indemnity

You agree to indemnify and hold us harmless from claims arising out of your use of the Services, your violation of these Terms, your User Content, or your violation of law, including sanctions and AML laws.

Governing law and dispute resolution

These Terms shall be governed by and construed in accordance with the laws of the British Virgin Islands.

Any dispute, controversy, or claim arising out of or in connection with these Terms, including any question regarding their existence, validity, or termination, shall be finally resolved by arbitration under the Rules of the Singapore International Arbitration Centre (SIAC).

The seat of arbitration shall be Singapore.

The language of arbitration shall be English.

Force majeure

We are not liable for delays or failures caused by events beyond reasonable control, including network outages, blockchain failures, validator issues, third-party provider failures, cyber incidents, sanctions changes, or regulatory actions.

Regulatory uncertainty

Regulation of Digital Assets and blockchain technology is evolving.

The Company may modify, restrict, or terminate Services to comply with applicable law or regulatory requirements.

Miscellaneous

Use of Cookies: We use cookies and similar technologies to improve functionality.

Assignment; severability; entire agreement; no waiver; notices; interpretation.
